2025/07/23 11:58 1/3 The second conditional

The second conditional

If I had enough money, I would buy that diamond necklace.

Definition

The second conditional refers to events that are not likely to happen in the future or to conditions that are not possible in the present.

Construction

If + past tense + modal verb in the simple past form + bare infinitive.

If they had more money, they would buy a new a new car.

'Were' is usually used for all forms of 'be' in the 'if' clause.

If they were rich, they would buy a new a new car.

Uses

Use

Examples

Hypothesis

If the airline lost my luggage, I would need to buy a suit for the meeting.

This is a hypothetical situation and the speaker may not even be travelling.

Contrast this with a first conditional sentence. 'If the airline loses my luggage, I will need to buy a suit'. In this case the speaker feels that there is a real risk that the airline will lose his luggage.

Contingency

What would you do if you had to choose another career?

Wishing

If I won the lottery, I'd buy a boat and cruise the world.

Suggesting

I think it would be better if we sent a small sample to the customers.

Advising

If I were you, I'd apply for a promotion.

Criticism

If this were my office, I'd tidy it up.

Polite request

Would it be all right, if I brought a friend with me?

2025/07/23 11:58 3/3 The second conditional

Formality

It is considered grammatically correct to use 'were' for all forms of 'be' in conditional sentences, but in spoken English you will often hear 'was' for I, he, she and it.

If I was rich, I would buy a boat.

If he wasn't so busy, he could have a holiday.

We would go to the park, if it wasn't raining.

In written English and certainly for any test situation, use 'were' for all forms of 'be'.
