

# Zero conditional

## Introduction

**If you heat water in a kettle, it boils.**

## Definition

The zero conditional refers to real events. The result of the condition is always the same.

## Construction

**'If' + present + present**

## Uses

Zero conditional sentences are used to talk about general truths and facts, not about individual, specific situations.

Use	Examples
Scientific facts	<b>If you add salt to water, it boils more quickly.</b>
Universal truths	<b>People put on weight if they eat too much.</b>
Things that happen regularly	<b>If I leave home at 8 o' clock, I arrive at work at 9 o'clock.</b>

**Note that** because the result is always the same, we can use 'when' as an alternative to 'if'. We also sometimes use 'whenever', especially for things that happen regularly:

**If/when people don't drink, they get thirsty.**

**If/when/whenever he's late for work, his boss gets angry.**

## Present continuous

We can also use the present continuous:

**If it's raining, people carry umbrellas.**

**If people are carrying umbrellas, it's probably raining.**

## Imperative

**Whenever you're tired, take a break.**

**When I'm working, don't disturb me.**

.

## Modals

Some modal verbs might be used in the main clause.

**If you go to another country, you should try to speak the language.**

**You can get a refund if the plane is delayed.**

## Zero or first conditional?

The first conditional is used for real, likely events. Compare these two sentences:

**If I leave home at 8.00, I arrive at 9.00. [this refers to every time I leave at 8.00]**

**If I leave home at 8.00, I'll arrive at 9.00. [this refers to a specific occasion in the future]**

## Examples

**The alarm goes off if there's a fire.**

**Only children go in the garden if it's raining.**

**When you work with people from other countries, you might have to do things differently.**

**If she's eating then she's getting better.**

**If you visit London, don't miss the Beefeaters at the Tower of London.**
